

The highest level of security.

The exclusive design of the Schlage Primus XP key system is patented until 2024. This is the longest patent in the market today and ensures that you get the highest level of security for the longest period of time.

Guaranteed exclusivity.

Primus XP offers two options for securing your key system exclusivity, depending on the level of service and support that you require.

End User Exclusivity

As an end user, you may purchase an exclusive Primus XP side bit milling through any authorized Schlage distribution center. Your unique side bit milling will be allocated directly to your organization. Exclusivity can be assigned one of three ways..

1. Zip code
2. Time zone
3. National

Dealer Exclusivity

Dealer exclusivity means that the side bit milling for your key system is allocated to your dealer, and that you have a sole source relationship with that dealer. You must purchase your system from that dealer and they will work with you to determine your level of exclusivity.

Ingersoll Rand's Security Technologies Sector is a leading global provider of products and services that make environments safe, secure and productive. The sector's market-leading products include electronic and biometric access-control systems; time-and-attendance and personnel scheduling systems; mechanical locks; portable security; door closers, exit devices, architectural hardware, and steel doors and frames; and other technologies and services for global security markets.

PRIMUS XP

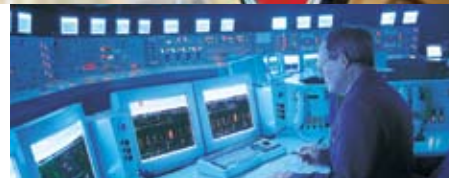

Only one key gives you complete control.

Only one key does it all.

PRIMUS XP

Introducing Schlage Primus XP. The most versatile key system in the industry.

No other key system delivers the scalability and flexibility of Primus XP. That's because Primus XP is compatible with a wide variety of existing systems and can support key systems of every size.

- Conventional and interchangeable cylinders
- Supports small to large key systems with multi-level key hierarchy where needed
- Fits most non-Schlage locks, eliminating costly and time-consuming hardware changes

The industry's strongest support network.

With 440 sales consultants at 23 offices across the country, Schlage provides unparalleled support. Schlage also has the nation's largest network of wholesale distributors. That means you have multiple resources for getting the products you need, as well as support for the ongoing maintenance of your system.

Key System Design & Specification

Our in-field team of Key System Consultants can help you design a key system that fits the unique needs of your buildings and allows for future growth. We can also assist in specifying the right products for every level of security.

Training

Schlage offers factory, regional and local training to ensure that you and your team are well versed in applying and maintaining the Primus XP key system.

Site Surveys

Our team of experts can work with you to evaluate your facilities and look for potential trouble spots, such as fire and life safety issues, code violations or maintenance needs. We'll make recommendations for cost effective ways to maintain security, while getting your system where it should be.

Support for every level of access control.

Because Primus XP is a backwards-compatible key system it can easily be integrated into your current system, even if you are dealing with a facility expansion or addition. Primus XP also supports the varied level of security needs you may have within a building or across a campus.

Primus XP is also flexible enough to support a range of security solutions, including Schlage mechanical, electro-mechanical and networked security solutions, as well as Falcon mechanical locks. Schlage also offers a variety of key system types.

- Open
- Restricted
- Restricted patented
- High security
