

CardTrax™

Account tracking program

Enhance your security without adding cost through our CardTrax™ account tracking program. We keep track of card numbers that have shipped and fulfill future orders so that card numbers are never duplicated. The program is available to clients who order cards on a regular basis.¹

Why would you want us to guarantee unique ID numbers for all your cards? CardTrax provides the following advantages:

- **Added security** – We ensure your facility code and badge ID combination is unique and never duplicated on any other cards we make.
- **Avoid card ordering mistakes** – You'll eliminate potential errors or order duplication from other offices and facilities in your organization. We'll keep track of the next badge ID number you need to assign to your next card order.
- **Flexibility** – You can order your cards through the same provider or a different provider each time—either way we'll still know what facility code to assign your cards and what badge ID number to start with.

- **No upcharges** – Other card providers often charge additional fees for card tracking services. We don't; we offer the same security without the added cost. Compare & save.
- **Compatible with HID® Corporate 1000™** – Our card tracking program fulfills card orders for both the 35C and 40X bit formats (please note 35C and 40X formats are only registered to end users). Any proximity credentials that were previously enrolled in the HID Corporate 1000 program are compatible with the CardTrax program. And there is no charge for our card tracking services.

¹ Minimum annual order quantity: 2000 cards/year or 10 orders per year.

The program is available to an end-user facility, integrator, or other business partners and is available for new and existing customers.
