Option Boards

## A DANGER A

To avoid risk of electric shock, turn off AC power to power supply before installing or wiring option board

This sheet covers:

| 900-4R <br> 4 Independently Controlled Relays <br> Page 2 |  | 900-8P <br> 8 PTC Protected Outputs |
| :---: | :---: | :---: |

Refer to installation instructions for compatible supply models - PS902, PS904, PS906, and PS914.

## 1 INSTALL OPTION BOARD(S) INTO POWER SUPPLY

## 900-4R

900-4R Specifications

| Inputs I1-I4 | Dry contacts required (Closed $=$ Active) <br> Connect control contacts between SC (Signal Common) and any input |
| :--- | :--- |
| Outputs 01-04 | $\bullet$ Form C contacts rated 30VDC, 3A (dry) •12/24VDC, 3A (wet) when AC powered •9.6-13.2VDC or 19.2- <br> 26.4 VDC when battery powered • Maximum load cannot exceed power supply ratings or 6A for outputs combined |
| Board Input Power | Board requires 0.18A max. of power supply output current to operate |
| Temperature Range | $32^{\circ}-120^{\circ} \mathrm{F}\left(0^{\circ}-49^{\circ} \mathrm{C}\right)$ |
| Compliance | UL 294, ULC-S318, RoHS, \& FCC Part 15 |
| Fire Alarm Input | Accepts $900-$ FA Fire Alarm Board (Optional) |

Function: Four independent dry-contact inputs control four Form C outputs

Powered Outputs
(Default)
By default, all outputs provide12/24VDC

Dry Contact Outputs
(Optional)
For dry contact outputs, remove appropriate jumpers and rotate $90^{\circ}$, then reinstall (Zone 1 - Zone 4)

900-4R Wiring Example
Fail Secure and Fail Safe Electric Strikes

Note:
Fail secure output only allowed if approved by Authority Having Jurisdiction

Refer to Wire Table
(page 4)

## 900-8F

900-8F Specifications

| Each Output | -Rated for supply maximum •12/24VDC when AC powered •9.6-13.2VDC or 19.2-26.4VDC when battery powered •Maximum load cannot exceed power supply ratings or 6A for outputs combined |  |
| :---: | :---: | :---: |
| Board Input Power | Board requires 0.045A max. of power supply output current to operate |  |
| Temperature Range | $32^{\circ}-120^{\circ} \mathrm{F}\left(0^{\circ}-49^{\circ} \mathrm{C}\right)$ |  |
| Compliance | UL 294, ULC-S318, RoHS, \& FCC Part 15 |  |
| Fire Alarm Input | Accepts 900-FA Fire Alarm Board (Optional) |  |
| F1-F8 | 32V, 7.5A, ATO blade style | A CAUTION: |
| F9 Main Fuse | 300V, 15A, 3AG style | For protection against risk of fire, replace fuse with same type and rating |

Function: Provides 8 independently-fused outputs.

Fire Alarm setting (if 900-FA installed)

- Jumper on J5: Active fire alarm turns off all outputs
- Jumper on J6: Active fire alarm turns off outputs 1-4 only

Terminals

Refer to Wire Table
(page 4)

Note:
Fail secure output only allowed if approved by Authority Having Jurisdiction

## 900-8P

900-8P Specifications

| Each Output | $\bullet 1.4 \mathrm{~A}$ maximum •12/24VDC when AC powered •9.6-13.2VDC or 19.2-26.4VDC when battery powered |
| :--- | :--- |
|  | $\bullet$ Maximum load cannot exceed power supply ratings or 6A for outputs combined |

Function: Provides 8 independent outputs, each protected by an automatically-resettable thermal fuse.

## Note:

Fail secure output only allowed if approved by Authority Having Jurisdiction

Wire Table: (Suggested maximum)

| Wire Ga <br> $(\mathrm{AWG})$ | Device Current <br> $($ Amps DC) | Output* <br> $($ max. ft) | Input <br> $(\mathrm{max} . \mathrm{ft})$ |
| :---: | :---: | :---: | :---: |
| 14 | 0.3 | 850 |  |
|  | 0.5 | 500 |  |
| 18 | 0.3 | 340 |  |
|  | 0.5 | 200 |  |

*Wiring allows for $10 \%$ voltage drop at device current at 12 or 24VDC
Max. $\mathrm{ft}=$ one way distance between power supply and device.
