

# ENGAGE™

## Mobile App for Device Commissioning

### Overview

The ENGAGE™ mobile app is used to commission and connect devices to industry leading physical access control software (PACS) or multifamily proptech systems. This also includes support for the following products:

- Schlage Control®, NDE, LE and XE360™ electronic locks
- MTB readers
- CTE and RC controllers
- ENGAGE Gateway (GWE)
- ENGAGE Test Kit (TKE)
- Von Duprin® Remote Undogging (RU) and Remote Monitoring (RM)

Please visit [us.allegion.com/alliances](https://us.allegion.com/alliances) for specific support and capabilities by provider.

### Features & Benefits

- Wirelessly add, configure or update locks at the door via mobile app using Bluetooth® enabled smart phone
- Can be used for other tasks including device firmware updates, hardware diagnostics and device audits
- Works with latest models of Apple and Android phones (see specific [device requirements](#))
- Intuitive user interface simplifies the commissioning process

The free mobile app is required to initialize Schlage and Von Duprin devices that are on ENGAGE Platform and is available for Apple and Android smart devices.
