Connect & Control More Doors

Easier Than Ever Before

Security Has Always Been at the Heart of Our Products

Walter Schlage invented the cylindrical lock in 1920; since then Schlage® has consistently delivered innovation and continuous improvement. Today, we continue to add the latest technology to our world-class locks to deliver a new level of efficiency and convenience for your facility.

With built-in intelligence, secure communication technology and the ability to read mobile credentials, Schlage Control®, XE360™, LE and NDE Series wireless locks and CTE controllers used with ENGAGE web and mobile apps can help:

- Increase productivity by managing devices and electronic credentials from anywhere
- Provide security and convenience by using mobile devices to gain access
- Save time by eliminating the need to visit devices to make changes
- Review and export device usage and history for detection and diagnostics

If you are looking for an affordable way to improve security while reducing operational costs, open the door to Schlage electronic solutions.

Bring the Added Benefits of Electronic Solutions to Any Door

Reduce time
and costs associated
with managing keys due
to frequent turnover

Enhance security
with more visibility
and control

Electronic Credentials Change the Game

- Credentials can be issued to residents, employees, visitors or service providers with restrictions to specific days and times
- Electronic credentials can be quickly added and revoked from anywhere
- Single credential can be used across all access controlled openings on site
- Enjoy the convenience of using a mobile device, plastic card or fob, PVC disc, or wearable to gain access

Schlage Mobile Bluetooth® Credentials

The Schlage Mobile Bluetooth Credential enables users to utilize a mobile device instead of a physical badge or key to gain access to an opening.

- Increased convenience and security for users
- Improved efficiencies for administrators; supports No-Tour
- Easy to use and manage
- Features advanced asymmetric encryption for added security and peace of mind
- Works even when there's no internet or cellular connection
- Available for iOS and Android phones

The Schlage Mobile Bluetooth Credential is available for sites managed by ENGAGE™ web and mobile apps and use Schlage mobile enabled locks and readers.

ENGAGE Cloud-Based Web & Mobile Apps

Whether you're looking to use electronic access control for the first time, or simply need an easy-to-use solution to manage your site, ENGAGE cloud-based web and mobile apps make it easy to connect and control doors from anywhere. ENGAGE improves efficiencies and provides the data you need to manage your business or property more effectively.

The ENGAGE cloud-based web and mobile applications deliver simple and convenient site set-up as well as the ability to manage users, assign access privileges and view audits and alerts from anywhere.

ENGAGE also has the capability to issue and manage Schlage Mobile Bluetooth Credentials - giving users the security and convenience of using their mobile device to gain access to ENGAGE managed openings.

Flexible ENGAGE solutions deliver a whole new level of ROI:

- Mitigate risks by providing more visibility and control to each opening
- Improve productivity by setting automatic lock and unlock schedules to common areas
- Improve efficiency by having the ability to remotely add and delete user access rights from anywhere
- Improve satisfaction by issuing one credential that can be used across an entire property or site

For solutions requiring real time updates please contact Allegion
at 877-671-7011 or visit us.allegion.com/alliances.

Manage Access

Manage your site from anywhere with ENGAGE cloud-based web and mobile applications.

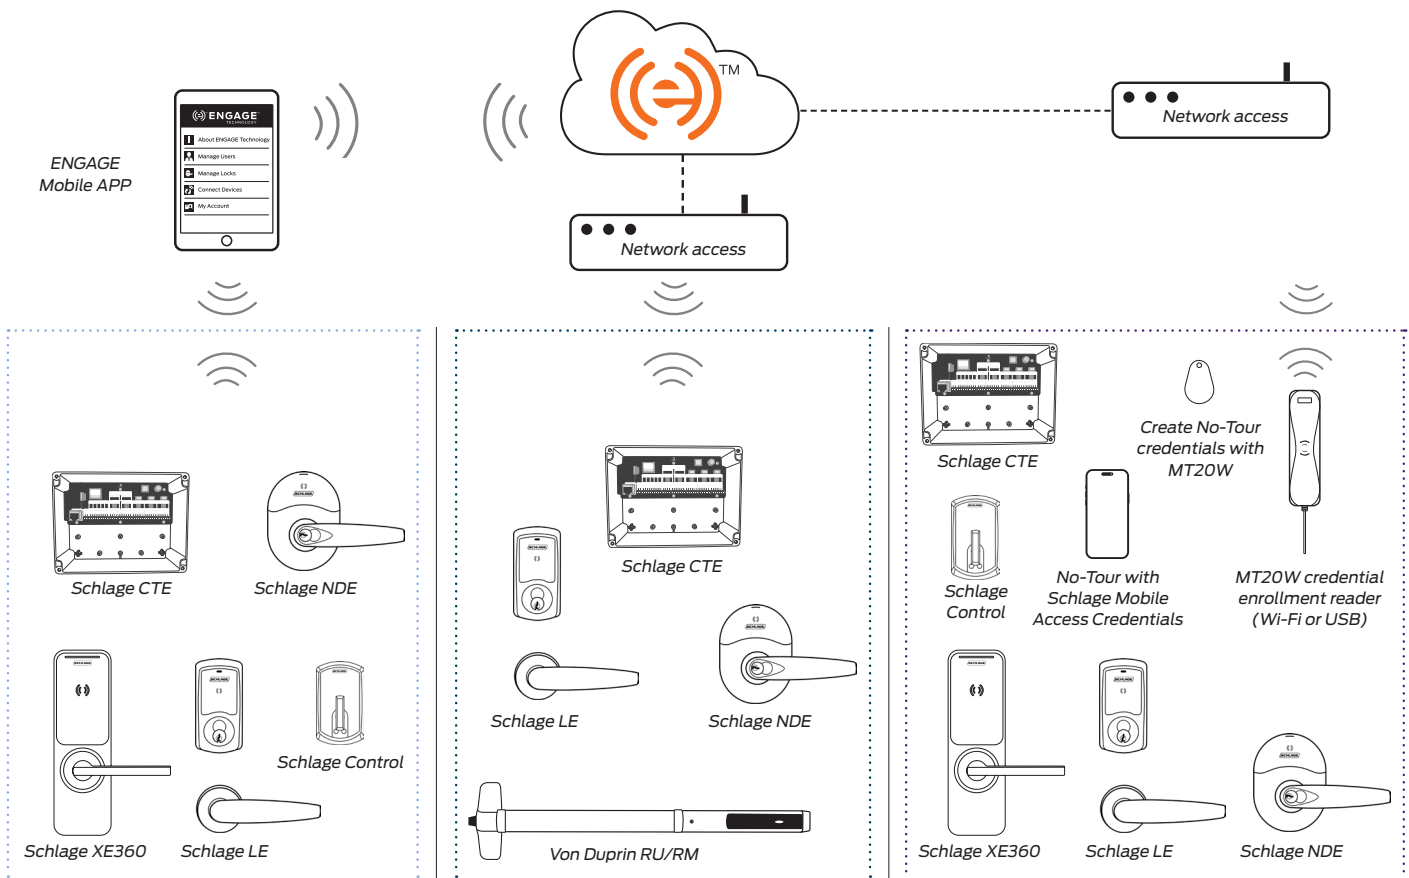

- Configure lock/device settings
- Add new users and enroll credentials
- Manage users and assign access privileges
- Set lock/device schedules, holidays, user schedules
- View and export audits and alerts
- Invite others to assist with administration

Update Locks & Devices

Send updates wirelessly at the lock with the ENGAGE mobile application on a Bluetooth® enabled smart phone, tablet, or leverage the existing Wi-Fi® network or built-in No-Tour capability to send updates without visiting the lock or device.

- Update access rights
- Update lock/device settings
- Update firmware
- Perform diagnostics

Immediate updates

Send updates at the lock/device, anytime, with the ENGAGE mobile app. Available on Schlage Control smart locks, NDE, LE and XE360 wireless locks, and CTE.

Automatic daily updates¹

Connect devices to the Wi-Fi network for automatic daily updates. Available on Schlage NDE and LE wireless locks, and CTE as well as Von Duprin RU/RM.

No-Tour via smart credentials

Eliminate the need to visit locks/devices by using 13.56 MHz smart or Schlage Mobile Credentials to deliver updates to access rights. Available on Schlage Control, NDE, LE and XE360 wireless locks, and CTE.

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in seamless access, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®.
