

Looks & Intelligence

XE360™ Series with RealSync™

FlexiBle Connectivity is Here

Interchangeable Flex Module™ allows for connectivity, memory & encryption upgrades without replacing the lock. Choose between two connectivity modes:

RealSync™

Real-Time Insights & Control—Without the Complexity

Real-time access control using building Wi-Fi. No wires, no need to visit the lock. Make changes anytime, anywhere.

Offline

Suitable when access control updates can be periodic and infrequent, using a Bluetooth® Low Energy mobile app. Features No-Tour and is field upgradeable to RealSync.

SEE THE VALUE OF REALSYNC

Persistently Connected

Administrators can manage locks anytime, from anywhere, and locks can send and receive information at any time.

- Request audit logs of access events on demand
- Receive monitoring alerts the moment a security event occurs
- Remote lock and unlock on demand
- Issue and revoke credentials on demand
- Firmware updates can be made remotely, without visiting the lock

Low Maintenance

Predictive notifications like low battery alerts reduce lockout visits and maintenance calls.

One-Year Battery Life

Surpassing the average of six months for wireless devices persistently connected to a Wi-Fi network.

Simplified Setup

No hubs, hard power, or wiring needed, just existing Wi-Fi. Upgrading from offline to RealSync is simple: reset the device, power down, upgrade the Flex Module, power up and reconnect.

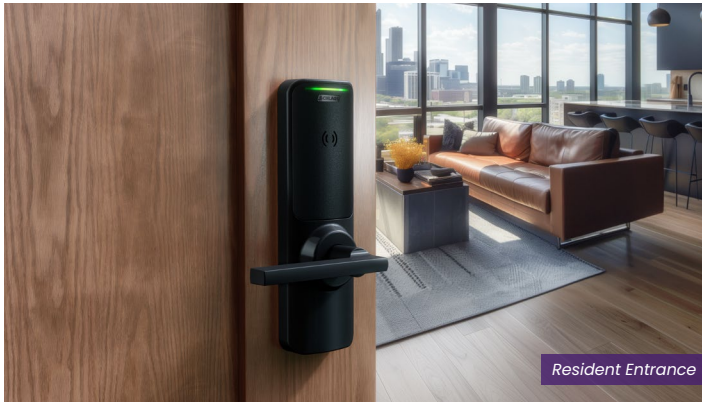

Saves Money

Save 60-70% on installation costs per opening (compared to a wired solution).

Seamlessly works with Schlage MIFARE® & MIFARE® DESFire® cards, wristbands, fobs and Schlage Bluetooth® mobile credentials.
