

Looks & Performance

XE360™ Series—the Next Generation Wireless Lock, Built for Multifamily

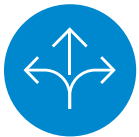

Adaptable

XE360 delivers innovation, intelligence and reliability wrapped in a modern, sleek design. Suiting with other Schlage products, including Schlage Control®, XE360 provides attractive options to meet the requirements of nearly any opening. Improve efficiency without sacrificing style across your entire property.

Reliable

Provide exceptional quality and reliability with products that exceed Grade 1*, all while showcasing next level design—inside and out. Assure residents and staff feel secure with available LED indicator options and uniquely concealed key override, standard on all locks.

Upgradeable

Be ready for the future and protect your investment with a new, interchangeable Flex Module™. As new trends emerge in technology, this chip easily allows for upgrades without having to replace the entire lock, saving you time, money and resources.

Mobile-Ready

Give residents the access experience they expect with Schlage MIFARE®, Bluetooth® and NFC mobile credential support. Save time by programming these credentials in the office instead of at the door with No-Tour capability.

DID YOU KNOW?

You can simplify the management of your access control system with XE360 because its open architecture design allows it to be easily integrated into our PACS Alliance Program.

* XE360 Mortise and Exit Trim Grade 1; Tubular Grade 2

Designed with the Entire Property in Mind, XE360 Has a Solution for Every Opening.
